

Report from Portugal

Contents

I. Country Profile

II. Strategic objectives

- A. Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

Indicator SO1-1: Trends in land cover

Indicator SO1-2: Trends in land productivity or functioning of the land

Indicator SO1-3: Trends in carbon stocks above and below ground

Sustainable Development Goal indicator 15.3.1: Proportion of land that is degraded over total land area

Voluntary targets

- B. Strategic objective 2: To improve the living conditions of affected populations

Indicator SO2-1: Trends in population living below the relative poverty line and/or income inequality in affected areas

Indicator SO2-2: Trends in access to safe drinking water in affected areas

Voluntary targets

- C. Strategic objective 3: To mitigate, adapt to, and manage the effects of drought in order to enhance resilience of vulnerable populations and ecosystems

Voluntary targets

- D. Strategic objective 4: To generate global benefits through effective implementation of the United Nations Convention to Combat Desertification

Indicator SO4-1: Trends in carbon stocks above and below ground

Indicator SO4-2: Trends in abundance and distribution of selected species

Voluntary targets

- E. Additional indicators for strategic objectives 1, 2 and 4

- F. Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level

Indicator SO5-1: Trends in international bilateral and multilateral official development assistance

Indicator SO5-2: Trends in domestic public resources

Indicator SO5-3: Trends in number of co-financing partners

Indicator SO5-4: Resources mobilized from innovative sources of finance, including from the private sector

II. Implementation framework

- A. Financial and non-Financial resources
- B. Policy and planning
- C. Action on the ground

Country Profile

Land area

Indicated the total land area, the area covered by water bodies and total country area:

Year	Total land area (km²)	Water bodies (km²)	Total country area (km²)	Comments
2 0 0 0	90.645	1.748	92.393	
2 0 0 5	90.538	1.855	92.393	
2 0 1 0	90.474	1.919	92.393	
2 0 1 5	90.437	1.956	92.393	
Add row				

Demographics

Estimates of the urban, rural and total population living in your country:

Year	Urban (thousands)	Rural (thousands)	Total (thousands)	Comments
2000	5.597,6	4.692,30	10.289,9	
2001	5.704,03	4.658,67	10.362,7	
2002	5.800,19	4.619,44	10.419,63	
2003	5.886,96	4.571,86	10.458,82	
2004	5.921,05	4.517,81	10.483,86	
2005	6.041,72	4.461,61	10.503,33	
2006	6.117,34	4.404,95	10.522,29	
2007	6.204,26	4.349,08	10.553,34	
2008	6.272,15	4.290,95	10.563,01	
2009	6.342,38	4.231,1	10.573,48	
2010	6.403,43	4.169,29	10.572,72	
2011	6.352,58	4.099,82	10.542,4	
2012	6.466,14	4.021,09	10.487,23	
2013	6.488,87	3.938,43	10.427,3	
2014	6.518,22	3.856,6	10.374,82	
2015	6.563,64	3.777,69	10.341,33

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

Sources: Land Areas: DGT 2018 - An2 and APA 2018 PT UNFCCC NIR (180508) ~An3; Population total: INE

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification land degradation, promote sustainable land management and contribute to land degradation neutrality

S01-1

Trends in land cover

Land cover

Quantitative data

National level estimates of the distribution of the main land cover classes (in kilometres squared (km²)). Default data are derived from the Agência Portuguesa do Ambiente NIR / UNFCCC, May 8th 2018  and they can be amended as appropriate.

	Land cover (km ²)					
Year	Tree-covered areas	Grassland	Cropland	Wetland	Artificial surfaces	Other Land
2000	42.190	18.495	24.864	1.748	4.001	1.096
2001	42.386	18.343	24.719	1.769	4.084	1.092
2002	42.582	18.190	24.575	1.791	4.167	1.089
2003	42.778	18.038	24.431	1.812	4.250	1.085
2004	42.974	17.885	24.286	1.833	4.333	1.082
2005	43.170	17.733	24.142	1.855	4.416	1.078
2006	43.336	17.580	23.998	1.876	4.499	1.075
2007	43.562	17.428	23.853	1.897	4.580	1.071
2008	43.573	17.379	23.858	1.905	4.627	1.051
2009	43.583	17.330	23.863	1.912	4.674	1.030
2010	43.594	17.280	23.869	1.919	4.721	1.010
2011	43.605	17.229	23.875	1.927	4.768	989
2012	43.616	17.178	23.881	1.934	4.815	969
2013	43.627	17.127	23.887	1.941	4.862	948
2014	43.638	17.076	23.894	1.949	4.909	928
2015	43.649	17.025	23.900	1.956	4.956	907
Net area change	1.459	-1.470	-964	208	955	-189

Land cover area change matrix (in squared kilometers).

Final class \ Initial class	Tree-covered areas	Grassland	Cropland	Wetland	Artificial surfaces	Other land

Please answer the following question if you have edited or replaced the default data using other data sources:

Sources of information

Provide the source of data.

Annex3: Agência Portuguesa do Ambiente (2018) Portuguese National Inventory Report on 

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive land cover changes as well as their direct and/or indirect drivers:

Land conversion		Net area change (Km ²)	Driver(s)		Description of changes	Comments	
From	To		Direct (Choose one or more items)	Indirect (Choose one or more items)			
Tree-cove	Cropland		Discharges Release of airbr Disturbance of Any other	Population pre Land tenure Poverty Labour availab Education, acc		Also forest fires	
Cropland	Artificial s		Deforestation Over-exploitati Overgrazing Industrial activ Urbanization	Population pre Land tenure Poverty Labour availab Education, acc			
Add row							

Hotspots/brightspots

Indicate where in your country the most significant hotspots/brightspots related to land cover are located:

Hotspots/brightspots	Location	Area (Km ²)	Comments	
Hotspot	Norwest, Central We +		Urbanization, Population pressure; Deforestation; Overexploitation	
Brightspot	Noreast, Central East +		Forestation	
Add row				

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

Annex2; and Annex3: Agência Portuguesa do Ambiente (2018) Portuguese National Inventory Report on Greenhouse Gases 1990 - 2016. Cp. 6 Land Use, Land Use Change and Forestry (CRF 4), Rep. APA May, +

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01-2

Trends in land productivity or functioning of the land

Land productivity dynamics

Quantitative data National level estimates of land productivity dynamics within each land cover type: area covered by each class of land productivity dynamics (in km²).

Default data are derived from the Joint Research Centre's Land Productivity Dynamics dataset

and they can be amended as appropriate

Net land productivity dynamics (2000-2010) (km²)

Land cover class	Declining	Moderate decline	Stressed	Stable	Increasing	No data
Tree-covered areas						
Grassland						
Cropland						
Wetland						
Artificial surfaces						
Other land						

Estimates of land productivity dynamics for areas where a land conversion to a new land cover type has taken place (in km²)

Land conversion Net area change		Net area change	Net land productivity dynamics (2000-2013) (km ²)					
From	To	km ²	Declining	Moderate decline	Stressed	Stable	Increasing	
Add row								

Please answer the following questions if you have edited or replaced the default data using other data sources:

Other metrics

If your country uses a different metric to assess land productivity (e.g. Normalized Difference Vegetation Index (NDVI), Enhanced vegetation Index (EVI)), specify which metric your country uses and provide the data here.

LDI - 2dRUE (Annex4 Gabriel del Barrio et al 2010 and San Juan et al. 2011) and in Annex1 CNCCD 2014. 

Sources of information

Provide the source of data

Annex 4 Gabriel del Barrio et al 2010 and Marieta San Juan et al 2011; Annex1 CNCCD 2014 Relatório 

Strategic objectives

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive changes in land productivity as well as their direct and/or indirect drivers:

Land cover class / Land conversion	Area (km ²)	Land productivity dynamics	Direct (choose one or more items)	Indirect (choose one or more items)	Comments	
			Improper manag Improper soil m Deforestation Over-exploitati Overgrazing	Population pre Land tenure Poverty Labour availabi Education, acce		
Add row						

Hotspots/Brightspots

Indicate where in your country the most significant hotspots/brightspots related to land productivity are located.

Hotspots/brightspots	Location	Area(km ²)	Comments	
Hotspot	Degrading lands	1.357	Est and South Main Portugal	
Brightspot	Improving land part	2.930	Improving new forests with Quercus and or Pinus pinaster	
Add row				

Complementary information

Provide any complementary information you deem relevant and upload any complementary document into the space provided on the PRAIS portal

Annex4 Land Condition Map and San Juan 2011

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01-3 Trends in carbon stocks above and below ground

Soil organic carbon stocks

Quantitative data

National level estimates of the soil organic carbon (SOC) stock in topsoil (0-30 cm) within each land cover type (in tonnes per hectare).

Default data are derived from the Annex 2 and 3

and they can be amended as appropriate.

	Soil organic carbon stock in topsoil (t/ha)					
Year	Tree-covered areas	Grassland	Cropland	Wetland	Artificial surfaces	Other Land

Sources of information

Provide any complementary information you deem relevant and upload any complementary document into the space provided on the PRAIS portal

Vd. Annex3 APA and Annex1 CNCCD 2014 Relatório proposta PANCD 2014, capítulo 5.8 pags. 151 a 160

Strategic objectives

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive changes in organic carbon stock in soil as well as their direct and/or indirect drivers

Land cover class / Land conversion	Area (km2)	Soil organic carbon stock change (t/ha)	Direct (choose one or more items)	Indirect (choose one or more items)	Comments	
			Improper management Improper soil management Deforestation Over-exploitation Overgrazing	Population pressure Land tenure Poverty Labour availability Education access		
			Improper management Improper soil management Deforestation Over-exploitation Overgrazing	Population pressure Land tenure Poverty Labour availability Education access		
			Improper management Improper soil management Deforestation Over-exploitation Overgrazing	Population pressure Land tenure Poverty Labour availability Education access		
Add row						

Hotspots/Brightspots

Indicate where in your country the most significant hotspots/brightspots related to soil organic carbon stock are located

Hotspots/brightspots	Location	Area(sq km)	Comments	
Add row				

Complementary information

Provide any complementary information you deem relevant and upload any complementary document into the space provided on the PRAIS portal

Annex3 APA and Annex1 CNCCD 2014 Relatório proposta PANCD 2014, capítulo 5.8 pags. 151 a 160

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01

Proportion of land that is degraded over total land area (Sustainable Development Goal indicator 15.3.1)

Proportion of land that is degraded

Indicate the total area of land that is degraded (in km²), and the proportion of degraded land relative to the total land area (defined as the total surface area of a country less the area covered by inland waters, like major rivers and lakes), and the year.

Total area of degraded land (Km ²)	Proportion of degraded land	Year
29.121	32,2	2000-2010

Method

Did you use the 3 sub-indicators (i.e. land cover, land productivity dynamics and soil organic carbon stock) to compute the proportion of land that is degraded?

- ☐ yes
☐ only 2
☒ only 1
☐ no

Did you apply the One Out, All Out principle to compute the proportion of land that is degraded?

- ☐ yes
☒ no

If no, indicate the method used to assess the proportion of land that is degraded

[Click here to enter text.](#)

Level of confidence

Indicate your country's level of confidence in the assessment of the proportion of land that is degraded:

- ☒ High (Based on comprehensive evidence)
☐ Medium (Based on partial evidence)
☐ Low (Based on limited evidence)

Describe why the assessment has been given the level of confidence selected above:

Based on field validation of the results from LDI - 2dRUE (San Juan et al. 2011)

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

Annex3 APA and Annex1 CNCCD 2014 Relatório proposta PANCD 2014, capítulo 5.8 pags. 151 a 160

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01

Voluntary targets

Land degradation
neutrality targets

Has your country set any land degradation neutrality target(s)?

Yes

No

☐

☒

Is your country planning to set any LDN target(s)?

Yes

No

☒

☐

Other targets

List any other target relevant to strategic objective 1 that your country has set, and indicate the expected year of achievement and level of application (e.g. national, subnational):

Target	Year	Level of application	
	<div><div></div><div></div><div></div><div></div></div>	<div>National level</div> <div>Subnational level</div>	<div></div> <div></div>
Add Row			

Complementary
information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

Click here to enter text.

Strategic objective 2: To improve the living conditions of affected populations

S02-1

Trends in population living below the relative poverty line and/or income inequality in affected areas

Relevant metric

Choose the metric relevant to your country:

- ☐ Proportion of population below the international poverty line
- ☒ Income inequality

Income inequality

Quantitative data

Estimate of income inequality (Gini index).

Year	Income inequality (Gini Index)	
2 0 1 6	33,5	
Add Row		

Sources of information Provide the source of data.

Eurostat (until 2000); INE (as from 2001) in PORDATA (last updated 160507)

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive changes in the indicator as well as their direct and/or indirect drivers.

Change in the indicator	Driver(s)		Comments	
	Direct (Choose one or more items)	Indirect (Choose one or more items)		
Decreasing income inequality	Overgrazing Industrial activities Urbanization Discharges Release of airborne p Disturbance of the w Any other	Population pressure Land tenure Poverty Labour availability Education, access to War and conflict Governance institut		
Add Row				

Hotspots/brightspots

If disaggregated data (e.g. per administrative division, urban vs. rural, affected areas etc.) are available in your country, indicate where the most significant hotspots/brightspots related to this indicator are located.

Hotspots/ brightspots	Location	Comments	
Hotspot	Country interior		
Add Row			

Complementary information

Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level

S05-1

Trends in International Bilateral and Multilateral Official Development Assistance

Quantitative data

Total amount of bilateral official development assistance (ODA) committed for activities relevant to the implementation of the Convention over the previous five years.

Data derived from information reported to the Organization for Economic Co-operation and Development (OECD) Development Assistance Committee (DAC), based on the Rio marker classification for desertification; they can be amended as appropriate.

Year	Total ODA committed for activities relevant to the implementation of the Convention
2012	1,047,802
2013	732,180
2014	573,708
2015	534,892
2016	422,048

Sources of information

If you have used other global/regional data sources or national data, please provide the source of data.

Annex8 CAMÕES, IP / DPC Report

Qualitative assessment

Complementary information

Provide any complementary information you deem relevant, including trends emerging from the data as indicated above and how they relate to financing the implementation of the Convention, and the types of projects and/or regions or countries on which your country has focused to the greatest extent.

CAMÕES, IP Report / OECD

Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level

S05-2 Trends in domestic public resources

Qualitative assessment

Trends in amount of domestic desertification financing

Choose the option representing the trend in the total amount of financing relevant for implementation of the Convention committed at the national level during the five-year period from 2012 to 2016

Trends in national-level financing for activities relevant to the implementation of the Convention
